Introduction

The ProSpanish Topic Vocabulary Course is designed to layer range and fluency onto the key structures learned with the Levels 1-6 Course. It is recommended that on completion of each level from the core Levels 1-6, you study the corresponding level from the Topic Vocabulary Course. The lessons within a level can be completed in any order.

Recommended sequence:

1. Watch the video, actively (pause when necessary to think through your answers).
2. Find the lesson in this booklet. Use the ten translation sentences to test yourself and to improve your recall speed - cover the Spanish, then check.
3. 'Read and Learn'. Read the Spanish paragraph and try to work out the meaning. There will be unfamiliar language embedded but most of it is guessable from the context. If time allows, commit as much of the paragraph and its meaning to memory as you can.*
4. Spaced repetition. It is not essential to memorise all the language before moving on. Dedicate a percentage of your learning time to regular revision.

*The type of English translation provided varies, depending on the exercise. In the grids and 10 sentence translations, the focus is on grasping the main structure and meaning of the target language. Giving English equivalents that closely resemble the original language's structure helps with the assimilation process. Whereas, the English paragraph translation provides a more realistic style, so that learners are exposed to the different ways meanings can be expressed..
